Instructions for Installing Feedreader 3.10

Platform: Windows XP
Browser: Internet Explorer 6

Note: You must have Administrator rights on your local computer in order to install software. If you do not have Administrator rights, contact your desktop maintenance group.

1. From the Feedreader download page (http://www.feedreader.com/download), click **Download Now** (See Figure 1).

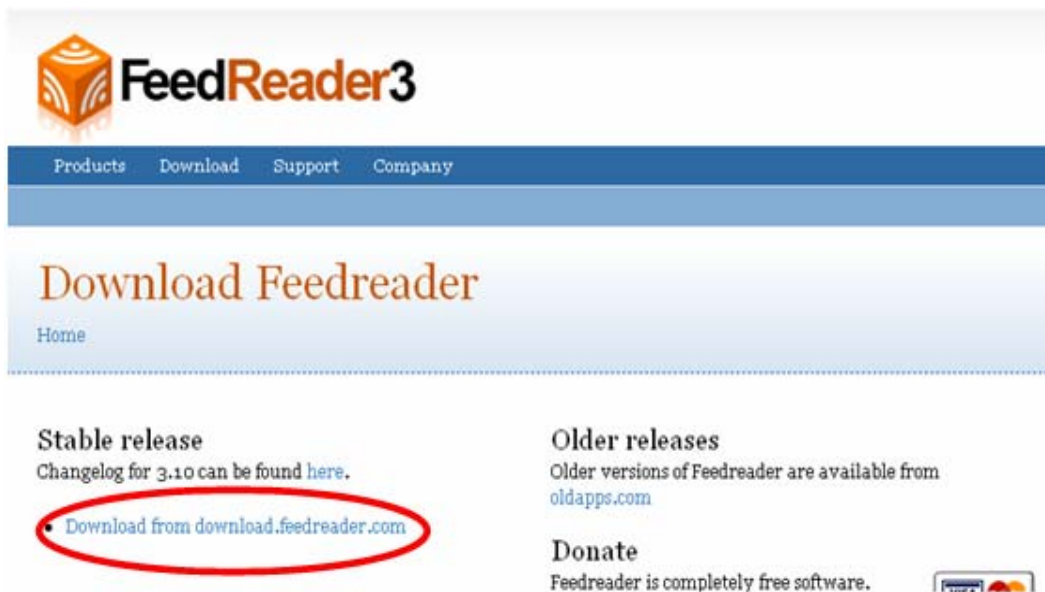

Figure 1 Download Now link

2. Click **Save** the save file to your Desktop (See Figure 2).

Figure 2 File Download - Save

3. Select Desktop as your "Save in" folder if that is not the folder displayed in that field then click **Save** (See Figure 3).

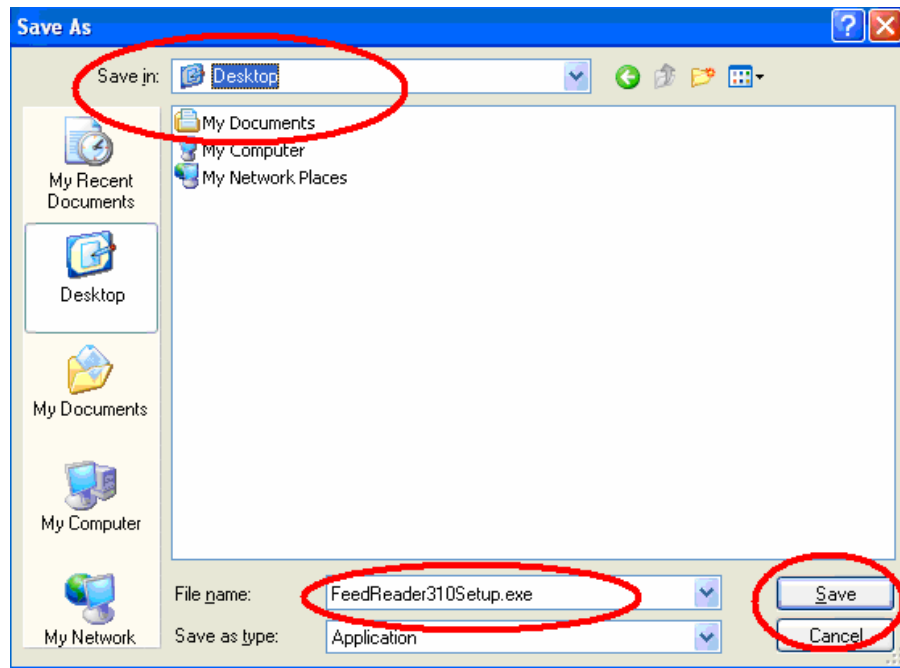

Figure 3 Save file to Desktop

4. Double-click the icon you saved on the desktop (See Figure 4).

You may receive a Security Warning (See Figure 5). Click **Run**.

Figure 5 Open File-Security Warning

5. Select the Setup Language – English is the default (See Figure 6).

Figure 6 Select Setup Language

6. The Setup Wizard will display, click **Next** (See Figure 7).

Figure 7 Setup Wizard

7. Read and Accept the License Agreement to complete the install then click **Next** (See Figure 8).

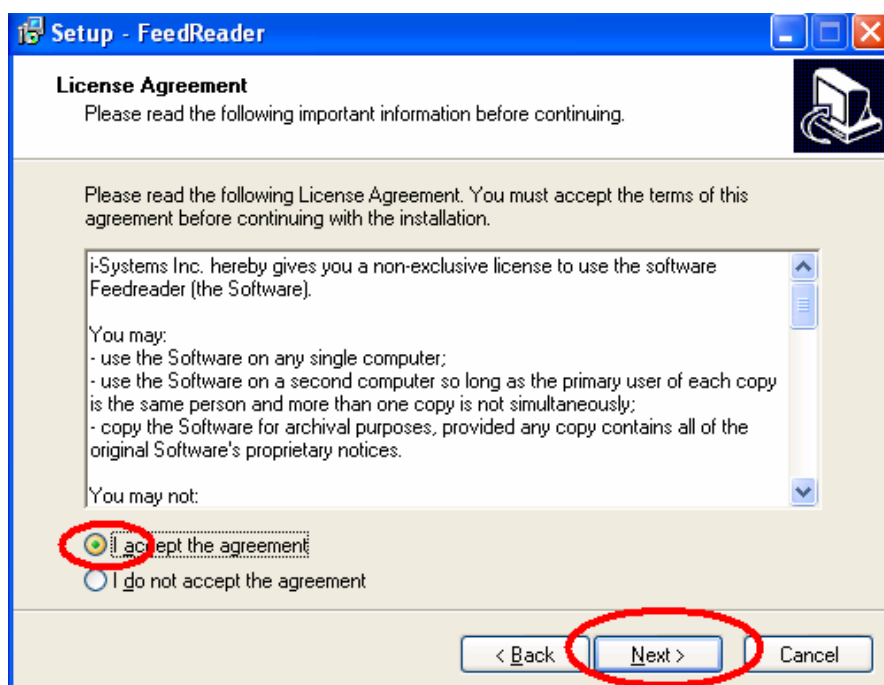

Figure 8 License Agreement

8. Select an install folder or **Next** to use the default (See Figure 9).

Figure 9 Setup Destination Location

9. Select the Start Menu Folder location then click **Next** (See Figure 10). FeedReader is the default, but you can Browse for an existing folder or rename it. This is what displays on your Start>Programs menu.

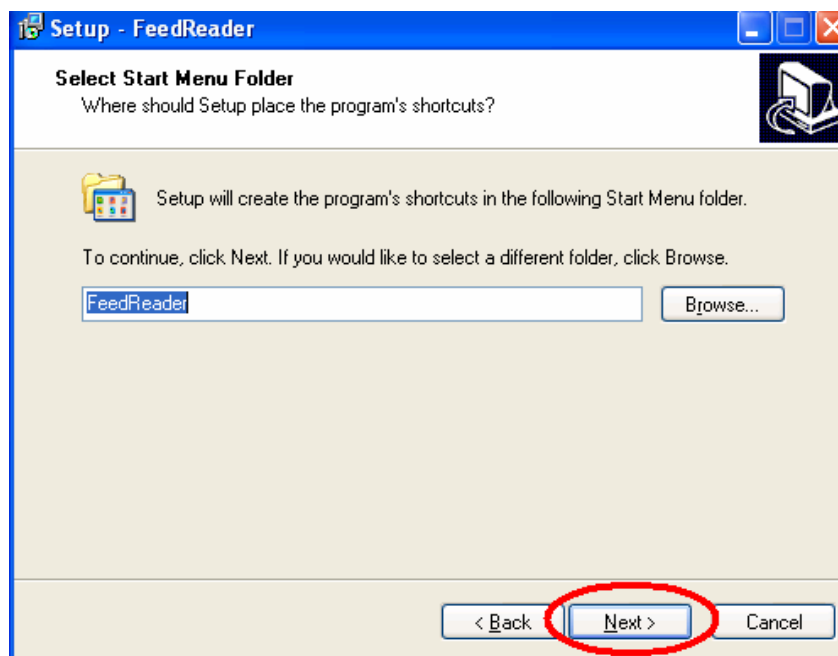

Figure 10 Start Menu Location

10. By default the options for creating an icon the Desktop and Quick Launch icon are selected. If you wish to have these icons (suggested), click **Next** (See Figure 11); otherwise, uncheck the boxes before clicking **Next**.

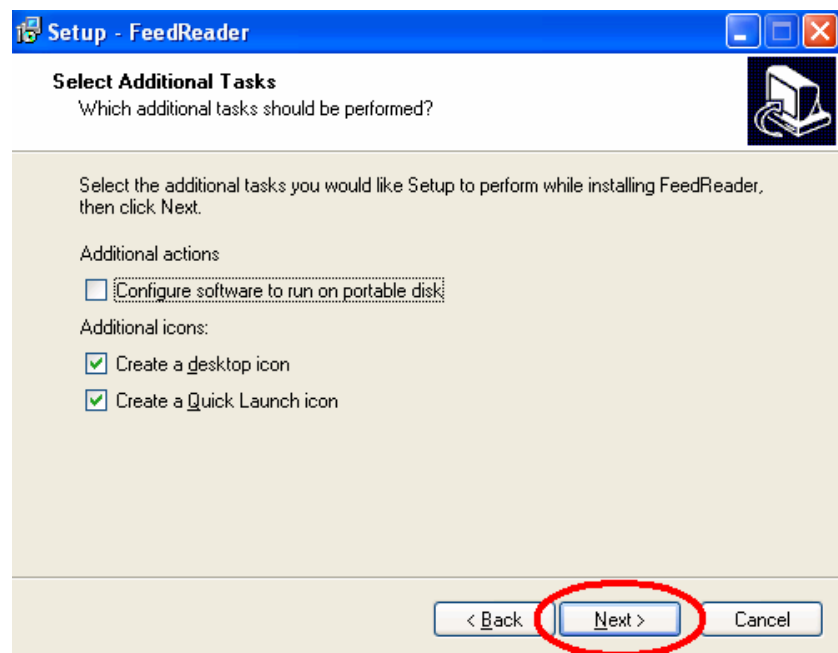

Figure 11 Select Additional Tasks to be performed by the install

11. Click **Install** (See Figure 12). Figure 13 shows installation progress.
